Introduction

The City of Tucson Transportation Department has begun preliminary studies which will lay the groundwork for the Grant Road Improvement Project, Oracle Road to Swan Road. This project will result in the widening of Grant Road from four travel lanes to six between Oracle Road and Swan Road, with improvements at major intersections and enhancement of bicycle lanes and pedestrian walks. The City has commissioned this Historic Properties Assessment to study the historic architecture and other historic/cultural features located within the project area, and will use this information to minimize the impact of the project on these historic elements. The study area for the Historic Properties Assessment includes the following:

- Properties abutting the Grant Road right-of-way between a line 700 feet west of the Oracle Road centerline and a line 700 feet east of the Swan Road centerline.
- Properties located within 700 feet north or south of the Grant Road centerline and abutting the following rights-of-way: Oracle Road, Stone Avenue, 1st Avenue, Euclid Avenue, Mountain Avenue, Campbell Avenue, Tucson Boulevard, Country Club Road, Palo Verde Boulevard, Alvernon Way, Columbus Boulevard and Swan Road.

The Historic Properties Assessment consists of two phases. Phase 1 consisted of mapping those properties which are eligible for designation as contributing properties to a National Register historic district. In order to qualify as a contributing property in a historic district listed on the National Register of Historic Places, a building must have: 1) been constructed at least 50 years ago (prior to 1965 is the age criterion used in this study); 2) retained its original architectural integrity; and 3) not be deliberately hidden from view by means of a wall or opaque fencing or vegetative screening greater than 48 inches tall. The Phase 1 map shows the locations of these qualifying properties as well as historic landscaping, signage, and other significant cultural features within the study area.

In Phase 2, the scope of the assessment was expanded to include further study of each property identified on the Phase 1 map. A State of Arizona Historic Property Inventory Form was prepared for each property judged to meet the eligibility criteria for the NRHP, unless one had been prepared as part of a previous historic assessment. For those properties for which such a form was previously prepared, a State of Arizona Historic Property Inventory Update Form was prepared. All of the Inventory and Update forms are included in this Historic Properties Assessment. Also as part of this further study, each contributing residential and commercial property was assigned a value of 1, 2 or 3 points to represent its degrees of integrity and contribution to the historic streetscape. The map of the study area was revised to show these values graphically by color, and is also included in this assessment.

Criteria: The standards used in this study for determining eligibility are the National Register criteria. These state that the property must have retained its original architectural integrity, must not be deliberately hidden from view by means of a wall or opaque fencing or vegetative screening greater than 48 inches tall, and must be at least 50 years old. This study includes those qualifying properties that will reach the 50 year mark at the time of the widening of the right-of-way, which will not occur for several years. Therefore, in order to be eligible within the parameters of this study, a building must have been constructed prior to 1965.

Sources of Data: The source of construction dates for the purposes of this study is the Pima County Assessor's records. There may be inaccuracies in the Assessor's data, although by visual survey, the dates appear to be correct in nearly every case. The exceptions are noted on the Historic Inventory or Update Form. Other sources include a historic survey of portions of the study area completed by The Architecture Company in 1990, and the National Register nominations for the Catalina Vista and Blenman-Elm Historic Districts, both completed in 2003.

ac#08022 Page

Two publications were used as sources of the architectural style designations used on the State of Arizona Historic Property Inventory Forms in this document. They are <u>A Guide to Tucson Architecture</u> by Anne M. Nequette and R. Brooks Jeffery, 2002, and <u>Tucson Post World War II Residential Subdivision Development 1945 – 1973, 2007, prepared for the City of Tucson Urban Planning and Design Department by Akros, Inc., Wilson Preservation, Coffman Studios, LLC, and HDR.</u>

Terms:

- When used in this document, the terms "vernacular" and "vernacular style" refer to the common building style of the period and place. They indicate the absence of a particular period style or other special architectural design that would differentiate the property in question from ordinary buildings of the same period and place.
- "Integrity", as defined in the National Register Bulletin: How to Apply the National Register Criteria for Evaluation, "is the ability of a property to convey its significance." As used in this study, it means that the property has retained "the essential physical features that enable it to convey its historic identity."
- National Register Eligible Residential, Commercial and Governmental properties are those buildings within the study area that meet the National Register criteria as described above. They are differentiated by their functional use, and also by the number of points, from one to three, assigned to indicate the relative importance of their contribution to the historic fabric.
- Architectural properties are those buildings that do not meet the age criterion used in this study, but because of the quality of their design contribute positively to the streetscape of Grant Road.
- Landscape features are well-established areas of vegetation that have an important visual impact on the study area.
- Cultural elements are items such as artwork and historic signage that have enlivened the study area over a long period of time.
- Historic Districts are defined geographic areas that have applied for and been granted inclusion on the National Register of Historic Places. Two such districts have been established within the study area and are shown on the map. They are the Catalina Vista Historic District and the Blenman-Elm Historic District.
- State of Arizona Historic Property Inventory Form and Inventory Update Form: These forms, provided by the State Historic Preservation Office (SHPO) are included in this assessment for all contributing properties. Inventory Forms are provided for all eligible properties not previously surveyed, and Inventory Update Forms are provided for those already having an Inventory Form.
- MAPP is the Modern Architecture Preservation Project of Tucson. Their mission is to raise awareness of the value of architecture of the Modern Movement in Tucson (1945-1975), including buildings, landscapes and urban design, and to provide assistance in the identification, documentation and preservation of modern architecture in Tucson.

ac #08022 Page 3

Summary of Historical Development Trends

The following narrative summarizes development trends along Grant Road between Oracle and Swan Roads. It describes the development patterns as evidenced by the types, styles and ages of the contributing historic properties located within the study area. It was noted in the 1990 historic survey of portions of the Grant Road corridor by The Architecture Company that Grant Road within our study area was originally three different streets. Luna Street was west of Park Avenue, North Street ran between Park Avenue and Campbell Avenue, and Grant Road continued east of Campbell. The three streets were connected and renamed Grant Road some time prior to 1954. The varying alignments of the three streets are the reason for the curving configuration of Grant Road between 1st/Euclid Avenues and Campbell Avenue. This narrative follows the same half-mile segments as the map of the study area, and begins at Oracle Road.

Segment 1 – Oracle Road to Estrella Avenue: Almost no residential development remains along Grant Road between Oracle Road and Estrella Avenue. A few scattered houses, nearly all converted to office or commercial use, remain as evidence of a past residential neighborhood. These were constructed from the mid-1920s to the mid-1940s. Some scattered commercial development dating from the 1950s through early 1960s also remains. Several of these buildings, most of them located east of Stone Avenue, no longer qualify as contributing historical properties due to substantial alterations or to walls or fences hiding them from the street. Several contributing commercial buildings remain along Oracle Road and along Stone Avenue within 700 feet of the Grant Road centerline. These date from the 1940s and 1950s. Each of these buildings was designed in the vernacular style of its time.

The commercial building at 2332 North Stone Avenue (below) at the intersection with Grant Road is the work of architect William Wilde, an important contributor to modern architecture in Tucson during the middle of the 20th century. It has been recommended for preservation by the Modern Architecture Preservation Project (MAPP). Interesting cultural features along this segment include two vintage neon signs from the late 1950s/early 1960s: the large pole-mounted sign announcing the Grant-Stone Shopping Center, at the northwest corner of Grant and Stone, and the National Auto Glass sign mounted to the façade of the building at 19 East Grant Road.

It appears that the trend of development along this part of Grant Road began as residential in the 1920s, turned to commercial following World War II and has continued into the very recent past. The architectural character of this segment of Grant Road is defined by this newer commercial development, leaving a few small pockets of the historic streetscape. These add interest, but are

lac #08022 Page

too few and far between to play a major role in defining the character of the roadway. The only area within this segment where a somewhat continuous piece of the historic fabric remains is along the east side of Stone Avenue immediately north and south of Grant.

Segment 2 – Estrella Avenue to 1st Avenue/Euclid Avenue: There are two small pieces of historic fabric that remain along this segment. One is a row of small commercial buildings occupying the north side of the block between Fontana and Geronimo Avenues. Two of these are converted houses built in 1938 and 1949, and the rest are vernacular style masonry commercial buildings. Two are small service garage buildings built in 1947 and 1948, and the other two both date from 1963. One is a retail store and the other, now used for car sales, is a former service station with a bold, angled glass front. The other remaining piece of historic fabric consists of the homes in the El Cortez neighborhood, located between 4th and 1st Avenues along the south side of Grant Road. Most of these are ranch style homes constructed during the 1940s and 1950s. Of those which still qualify as contributing, most face 1st Avenue, with only two of them fronting on Grant.

One newer building, designed and built in 1999 by Repp Design + Construction, should be considered as a potential future contributing property. This small gallery, Elizabeth Cherry Contemporary Art, at 441 East Grant Road, is interesting on its own, and also relates very sensitively to its neighbor to the west, an unusual looking two-story brick residence built in 1935 at 437 East Grant. There are no contributing properties west of Los Altos Avenue on the south side of Grant, and the north side of Grant east of Los Altos is occupied by a neighborhood shopping center developed in the late 1970s. No

cohesive sense of history remains along this segment. There are only small vignettes. Car sales lots and vacant land give the area a sparsely developed appearance even today.

Segment 3 – 1st Avenue/Euclid Avenue to Mountain Avenue: With the exception of a neighborhood shopping center on the north side of Grant at 1st Avenue, and two small commercial properties at the southwest corner of Grant and Euclid, this segment is lined with modest single-family residences located quite close to the roadway. The Jefferson Park Neighborhood lies to the south of Grant and extends from Euclid Avenue on the west to Campbell Avenue on the east. The Jefferson Park Neighborhood Association is in the application process for listing on the National Register of Historic Places as a historic district. Development of the neighborhood began in the late 1920s and continued into the 1950s and 1960s. A majority of the houses have retained their architectural integrity.

The north side of Grant Road between 1st Avenue and Park Avenue is occupied by a neighborhood shopping center. Begun in 1965 and expanded more recently, it is nondescript except for the curved roof of the Checker Auto Parts store and is set behind a large, asphalt-paved parking lot with sparse landscaping consisting of shrubs and tall palm trees. Residences in the Mountain First Avenue Neighborhood line the north side of the remaining blocks of Grant Road. They were constructed over the same general period as those in Jefferson Park, with more of these dating from the early part of the period. The majority of these have also retained their architectural integrity.

The homes along both sides of Grant Road define the character of this segment. There is little landscaping, probably due to past widening of the road, which also the reason for the loss of front

ac #08022 Page 5

yard space. One architecturally significant building, built too recently to qualify as a contributing property to a National Register historic district, is located along this segment of the roadway. It is a cast-in-place concrete branch bank building designed by architect Ivan Sarkiss and constructed in 1972. It's located at 945 East Grant Road (below left) at Park Avenue, and has been recommended for preservation by MAPP.

Segment 4 – Mountain Avenue to Campbell Avenue: This segment of the Grant Road study area is very similar in character to the eastern portion of Segment 3, where residences occupy both sides of the roadway. The south side is lined by homes of the Jefferson Park Neighborhood, as it is in Segment 3. The homes are similar in age as those between Euclid Avenue and Mountain Avenue and have retained their integrity to a similar degree. There are a few exceptions to the residential uses fronting the south side of Grant. The Ward 3 Office of the Tucson City Council is housed in a converted fire station constructed in 1952 at 1510 East Grant Road (above right). A few of the residences have been converted to office use, and there is a church near the intersection of Campbell Avenue. A recently constructed office building occupies the southwest corner of Grant and Campbell.

Homes in the Samos Neighborhood line the north side of Segment 4. They were constructed from the late 1920s through the mid-1950s. They are quite close to the roadway, and appear somewhat poorer in general condition than those on the south side of Grant Road. The City of Tucson owns several of the properties on the north side of this segment. The easternmost block on the north side of this segment is occupied by Jefferson Mini-Park (below left). A lawn and large trees make it an inviting spot and add a great deal of interest to travel along this segment.

As with Segment 3, the residences lining the roadway define its character. Shortened front yards are the norm here as well, since the road was most likely only two lanes wide when the homes were built. An interesting feature of this segment is the front site wall at 1600 East Grant Road (above right), a residence that has been converted to a medical office. Because the wall is over 48 inches tall, it disqualifies the house from contributing status. The wall itself, however, is

lac #08022 Page

sculptural and adds interest to the streetscape. It also includes a built-in bench that serves the adjacent bus stop.

Segment 5 – Campbell Avenue to Tucson Boulevard: The ends of Segment 5 of the Grant Road study area are anchored by commercial development. The northeast corner of Grant and Campbell is occupied by storefront commercial buildings from the early 1950s through the early 1960s. They front directly on the sidewalk and are served by small parking areas tucked behind and between the buildings. Across Grant, the Bookman's and Walgreens stores, built in the late 1950s and mid-1960s respectively, are surrounded on three street-facing sides by a parking lot. A furniture store constructed in 1961 is located on the north side of Grant near the Tucson Boulevard intersection. Its parking lot is in front of the building as well. A few small, newer commercial buildings occupy the east end of this segment.

The middle of this segment was developed as residential, and the south side of the remains so. The north side, in the Campbell-Grant Neighborhood, is lined with houses, most converted to office use, and a few small apartment complexes. The majority were built in the 1940s. Most are Spanish Colonial Revival, with a few built in the vernacular style of the time. Roughly half of the houses have lost much of their architectural integrity in the conversion to offices. One of the small apartment buildings bears its charming original metal sign stating "Palms Apts" (below left).

The south side of this segment is in the Catalina Vista Neighborhood, designated a Historic District on the National Register of Historic Places and characterized by Ranch style homes. Most were built in the 1940s, and a few in the 1950s and early 1960s. All are Ranch style or variants thereof, and most have retained their architectural integrity and remain contributing properties to the Historic District. An interesting feature of this segment is the narrow landscaped strip (above right) separating the travel lanes of Grant Road from an access road for the houses. Planted with desert vegetation and a few trees, the strip maintains the historic distance between the residential area and the busy street. Due to past widening of Grant Road, this is the only location in the study area where this occurs. The historic residential development is the defining characteristic of Segment 5.

Segment 6 – Tucson Boulevard to Country Club Road: A mixture of small commercial buildings and homes, some built too recently to contribute to a historic district, fill out the north side of Segment 6. The majority were constructed during the 1940s, with a few earlier and later. Most are sited close to the road. Designed in the vernacular style of the time, roughly half have lost their architectural integrity. The building at 2555 East Grant (following page, top left), built in 1948, is a well-designed and well-preserved example of glass-front commercial architecture. Tucson Fire Station #5, an interesting modern building by architect Fred Pace in concrete

ac #08022 Page

masonry, steel and glass is located at 2835 East Grant (top right). Cultural features include the façade of Grant Road Lumber at 2543 East Grant (middle left), although the building is too new to be eligible, its pole-mounted sign, and the sign across the street for Meyer's Garage at 2550 East Grant (middle right). The stylized arrows of these two nearly identical 1960s signs beckon motorists in opposite directions. A large U-shaped strip mall built in 1974 and recently remodeled occupies the northeast corner of Grant and Country Club Roads.

The south side of Grant in this segment belongs to the Blenman-Elm Neighborhood, which like Catalina Vista, is a National Register-listed Historic District. None of the residential character remains here, however, as the homes along Grant have been converted to commercial use or demolished and replaced by newer commercial buildings. This side of the segment was developed from the late 1930s into the 1960s. As on the north side, most buildings are close to the street. All represent the vernacular architecture of their time. A number of the older buildings have lost their architectural integrity through alterations and are no longer contributing properties. Two restaurant buildings near the west end of the segment were built in the early 1960s and have reached National Register age eligibility since the Historic District was established. One, at 2526 East Grant (bottom left) is an A-frame structure built in 1964, and the other, at 2564 East Grant

lac #08022 Page

(previous page, bottom right) is topped by a pair of sculptural brick chimneys. Their unusual profiles are established features of the Grant Road streetscape. An interesting row of storefront buildings (below) from the 1940s and 1950s occupies the southwest corner of Grant and Country Club Roads. The remaining historic fabric of Segment 6 adds interest but is insufficient to define the character of the roadway.

Segment 7 – Country Club Road to Palo Verde Boulevard: The dominant architectural feature of this roadway segment is Doolen Middle School (below left) at the northeast corner of Grant and Country Club Roads. The original school was built in 1942 with major additions in 1952, 1956, 1961 and 1993. The 1952 expansion, a long, one-story classroom wing, faces Grant Road behind a row of trees. Built in the vernacular schoolhouse style of the period, its graceful proportions, earth-toned brick walls and hip roof, along with the aforementioned row of trees, make a major contribution to Grant Road's historic streetscape. The remainder of Segment 7 is mostly commercial, with very few small houses here and there. The older buildings that remain here, residential and commercial, date from 1939 to the mid-1950s, and are small to medium size vernacular buildings. Several have lost their architectural integrity through alteration. Most are sited close to the street, and those that remain are scattered along the segment on both sides of the street.

The more recent structures are commercial and are generally larger than the older ones. These newer developments include retail stores, fast food restaurants and a few two-story office buildings. An interesting cultural feature is the tall sculpture (above right) attached to the building at 3402 East Grant Road. The one-story building was constructed in 1965, making it too recent

ac #08022 Page 9

to be considered a contributing property. The unique sculpture, however, is one of the Grant Road corridor's more recognizable features. As along Segment 6, the historic fabric here is too sparse to define the character of the streetscape.

Segment 8 – Palo Verde Boulevard to Alvernon Way:

Only four commercial buildings in Segment 8 meet the age criterion for contributing properties to a historic district and have retained their architectural integrity. Two of them, constructed in the early 1960s, are located roughly across the street from one another near the west end of the segment. The other two are near the east end of the segment, were built in the mid-1950s and are also roughly opposite each other across Grant. The remainder of the segment is

lined with more recent commercial developments. All are vernacular in style except the building at 3550 East Grant (above), whose rock façade makes a bold 1960s modern statement. The remainder of the segment is lined with more recent commercial developments.

There is almost no sense of how this part of the Grant Road streetscape looked prior to 1965. The most prominent landmark in this segment is the U-Haul sign near Palo Verde Boulevard, although it cannot be considered historic as it dates only from 1978.

Segment 9 – Alvernon Way to Columbus Boulevard: The east end of Segment 9 is flanked by large neighborhood shopping centers developed beginning in the 1980s. No residential development currently exists along this half-mile of Grant Road. There are a total of ten commercial buildings that meet the National Register age criterion and have substantially retained their integrity. They are spread along both sides of the middle and the eastern portion of the segment and separated by more recent commercial development. Half of these were constructed during the late 1940s and the other half during the late 1950s and early 1960s. Most are simple vernacular buildings and are sited close to the street. There are two exceptions: The Shelter, a mid-century modern neighborhood bar at 4155 East Grant built in 1961 (below left), and a converted residence at 4224 East Grant dating from 1947 (below right), both of which are set back behind parking areas.

ac #08022 Page 10

The two-story office building built in 1986 at 4067 East Grant (right) should be considered as a potential future contributing property due to its architectural quality. The architect of record is Richard M. Reif. With its parking lot tucked under the building and behind a landscaped berm, it presents a cleanly detailed facade of glass and concrete to the street. Although there are more properties in this segment than in Segment 8 that would qualify as contributing to a historic district, they are too few to define character.

Segment 10 – Columbus Boulevard to Swan Road: In this segment, only three small houses just east of Columbus on the north side of Grant are of sufficient age to qualify as contributing properties to a historic district. All are small houses built in the 1930s. Two of these have been converted to office use and have been altered, losing their architectural integrity, one through closure of a prominent front window and porch opening, and the other through additions that significantly changed the building's appearance. This leaves only one qualifying property in the segment. The remainder of this easternmost segment of the study area is lined with newer retail and office buildings, an adult care center and a large apartment complex.

Conclusion: It appears from remaining evidence that concentrated residential development began in the study area in the 1920s in and around the Mountain-First Avenue and Samos neighborhoods, which make up the north side of Segments 3 and 4. At that time, this portion of Grant Road was named North Street, and was not part of a continuous east-west corridor. Development filled in this area during the 1930s and 1940s, and gradually spread across North Street to the south as well as to the west along Luna Street and to the east along Grant Road. The majority of this development consists of small Spanish Colonial bungalows. There are similar properties located nearly as far west and east as the study area extends, but those are too scattered and few in number to show a pattern of development.

Construction of Ranch style houses began in the Grant Road study area in the 1940s and continued into the 1960s. There are a number of early Ranch style houses along Grant Road in the Jefferson Park neighborhood, which occupies the south side of Segments 3 and 4. The Catalina Vista Historic District, to the east across Campbell Avenue, is recognized by the National Register of Historic Places as the first subdivision in Tucson designed around the Ranch style house and the family car. By the time the Ranch style movement was in full swing, around 1954, Grant Road had become a continuous east-west corridor through Tucson.

A good deal of commercial development also took place within the study area during the 1940s through early 1960s. Most of this is seen at major intersections along Grant and is most concentrated from Stone Avenue on the west to Country Club Road on the east, although commercial buildings from this era are scattered all along the study area. In addition, a number of residences from the 1930s and 1940s have been converted to office or retail use. Evidence of this type of conversion of use is seen along Grant all the way from Oracle Road to Swan Road. It is most concentrated, however in Campbell Grant neighborhood on the north side of Segment 5, and in the Blenman-Elm Historic District, on the south side of Segment 6. Blenman-Elm is characterized as a vanguard of Ranch style homes in Tucson, but no evidence of this remains along Grant Road, as the homes there have all been demolished or converted to commercial use.

The most complete remaining historic fabric in the Grant Road study area exists in the residential neighborhoods located in Segments 3, 4 and 5, from 1st/Euclid Avenues on the west to Tucson Boulevard on the east. It becomes gradually more sparse and less well defined beyond those boundaries. There are, however, reminders all along Grant Road of the history of Tucson's 20thcentury built environment.

Recommendation of Alignment

Following is our recommendation, based on the perceived value of contributing historic properties, for alignment of the future Grant Road right-of-way. Each residential and commercial property was evaluated using a three point scoring system. A property or feature receiving three points would be one in its original or near original state, contributing the maximum value to the surrounding historic fabric. A property given two points would be considered to have a median value as a contributing property. One that receives only one point would qualify as a contributing property under the criteria used in this assessment, but because of alterations and/or condition, contributes minimally to the historic fabric.

Using this point system, we reviewed various hypothetical alignments of the future roadway in order to determine which would leave the existing historic fabric intact to the greatest extent. The alignment which would accomplish this is as follows:

Segment 1: Oracle Road to Estrella Avenue: Only individual contributing buildings and pairs of them remain in this segment. There is no existing continuous historic fabric, except along the east side of Stone Avenue to the north and south of the Grant Road right-of-way. Contributing properties are distributed roughly equally on both sides of Grant. A north alignment of the new right-of-way is preferable, as it would preserve the Finish Masters building at 2332 N. Stone, by architect William Wilde, the most prominent contributing property in this segment. If possible, it is also desirable to preserve the former service station across the street from Finish Masters at 1 East Stone Avenue.

Segment 2: Estrella Avenue to 1st/Euclid Avenues: Most of the contributing properties along this segment are located on the north side of Grant in the two blocks between Fontana and Los Altos Avenues. From a historic preservation viewpoint, the preferred alignment here would transition from a north to a south alignment between Estrella and Fontana Avenues, continue along the south side, and then shift back to the north side between Los Altos and 1st/Euclid Avenues.

Segment 3: 1st Avenue to Mountain Avenue:

Segment 3a: 1st Avenue to Park Avenue: A north alignment of the right-of-way that shifts to the south just west of Park Avenue would preserve most of the houses on the south side of the roadway as well as the Compass Bank building by Ivan Sarkiss at 945 East Grant Road.

Segment 3b: Park Avenue to Mountain Avenue: A south alignment here would preserve more of the historic fabric.

Segment 4: Mountain Avenue to Campbell Avenue: Our point system yields nearly equal totals on both sides of the right-of-way in this segment. A north alignment would, however, preserve somewhat more of the remaining historic fabric than would a south alignment, and substantially more than one that meanders. It would be very desirable to shift the alignment slightly to the south at the east end of the segment in order to preserve Jefferson Mini-Park, located at the northeast corner of Grant Road and Martin Avenue. If a north alignment in this segment makes preservation of the mini-park impossible, we would recommend a south alignment instead. The park's mature trees would be impossible to replace in the foreseeable future.

Segment 5: Campbell Avenue to Tucson Boulevard: A north alignment for this segment would preserve far more of the existing historic fabric than any other option. A great majority of the residences on the south side of the right-of-way in the Catalina Vista Historic District have

ac #08022 Page ^c

retained their integrity and remain contributors to the historic district. The landscaped strip separating the access road to these homes from Grant Road traffic is a historic feature well worth preserving.

Segment 6: Tucson Boulevard to Country Club Road: This is another segment where the point totals are almost equal on both sides of the roadway. There is a greater concentration of contributing properties along most of the north side, west of the Margaret Avenue alignment, and a good number on the south side, east of Margaret Avenue. The recommendation here is for a south alignment. While it is desirable to preserve the properties on the south side between Margaret and Country Club Road, this may not be feasible.

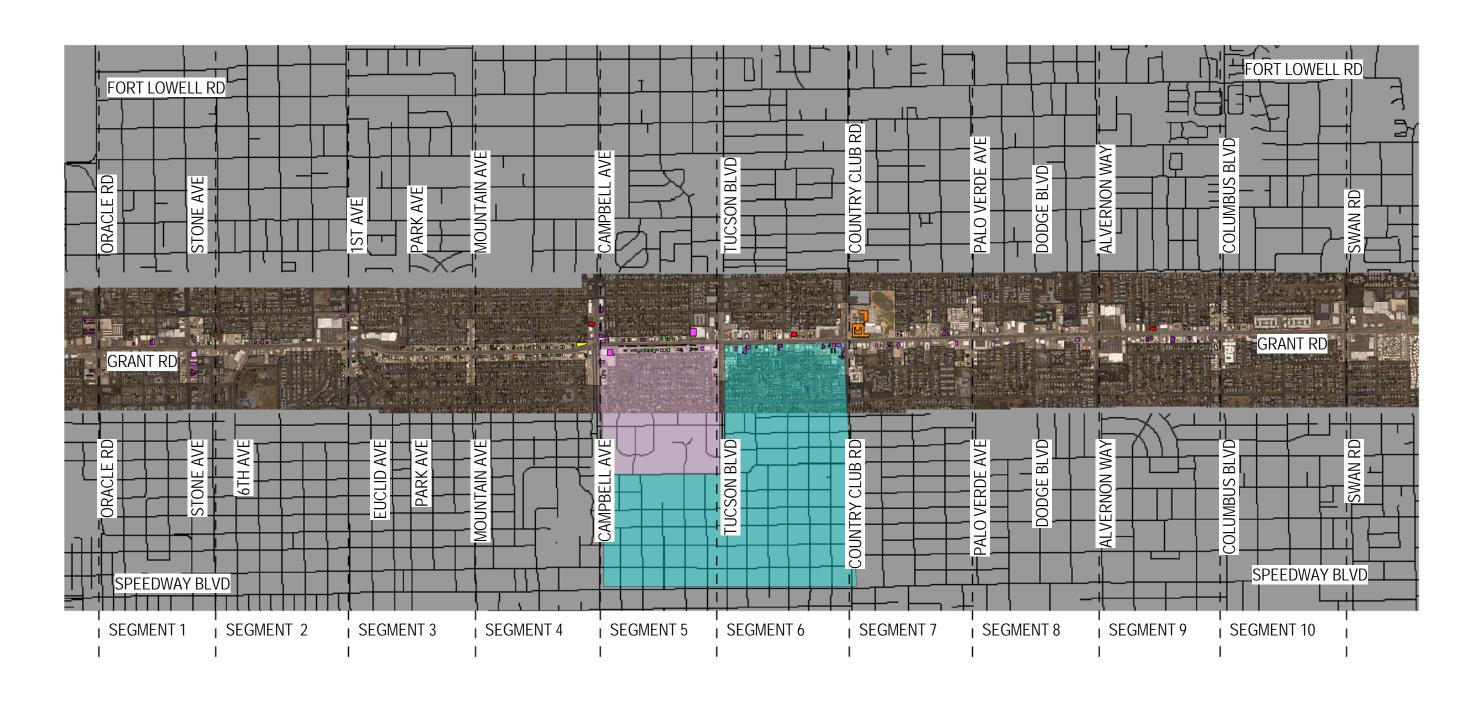

Segment 7: Country Club Road to Palo Verde Avenue: A south alignment is preferred in this segment as well. Doolen Middle School is the largest contributing building in the entire study area. There is also a small group of small former residences immediately east of the school property, and a strip of small commercial buildings just east of Sparkman Boulevard which are contributing. There are fewer contributing properties on the south side, and they are more widely scattered.

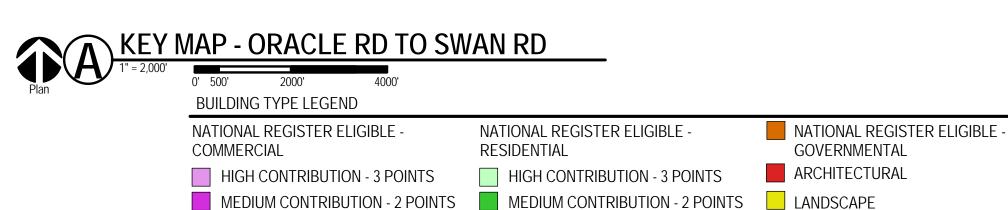

Segment 8: Palo Verde Avenue to Alvernon Way: There are only four contributing properties in this segment. They are evenly divided between the north and south side of the right-of-way, and are widely separated. Those on the south side are more prominent, so the recommendation, although a weak one, is for a north alignment.

Segment 9: Alvernon Way to Columbus Boulevard: The point system used in evaluating the contribution of properties yields a higher total on the north side of this segment. The recommendation here is for a south alignment. Because there are no contributing properties in the westernmost 1,000 feet of the segment, the alignment could shift there.

Segment 10: Columbus Boulevard to Swan Road: There is only one contributing property in this segment, a small former residence at 4351 East Grant. Its future is uncertain, as some of its similar neighbors have been insensitively remodeled for commercial use and others have been recently demolished. The very weak recommendation here is to continue the south alignment of the new right-of-way in this segment.

We also recommend, particularly in residential areas, increasing the distance of the curb from the buildings wherever possible. Past widening of the roadway has decreased this distance substantially. It is very desirable to restore the original relationship of the roadway to the houses where the historic fabric is to be preserved.

SIGNIFICANCE

To be eligible for the National Register of Historic Places, a property must present an important part of the history or architecture of an area. Note: a property need only be significant under one of the areas below to be eligible for the National Register.

A. HISTORIC EVENTS/TRENDS (On a continuation sheet describe how the property is associated either with a significant historic event, or with a trend or pattern of events important to the history of the nation, the state, or a local community.)

B. PERSON (On a continuation sheet describe how the property is associated either with the life of a person significant in the past.)

C. ARCHITECTURE (On a continuation sheet describe how the property embodies the distinctive characteristics of a type, period, or method of construction, or that represents the work of a master, or possesses high artistic values.)

Outbuildings: (Describe any other buildings or structures on the property and whether they may be considered historic.)

INTEGRITY	Y
-----------	---

To be eligible for the National Register, a property must have integrity, that is, it must be able to visually convey its impo	rtance
Provide information below about the property's integrity. Use continuation sheets if necessary.	

- 1. LOCATION lacktriangle Original Site \Box Moved (date $\locate{}$) Original Site:
- 2. DESIGN (Describe alterations from the original design, including dates known or estimated when alterations were made)
 Modern; storefront replaced, partially with new storefront and partially with wood
 framed wall.
- 3. SETTING (Describe the natural and/or built environment around the property)

 Commercial corner

Describe how the setting has changed since the property's period of significance:

4. MATERIALS (Describe the materials used in the following elements of the property)

Walls (structure): Unk. Foundation: Conc. Slab Roof: Parapet

Windows: New aluminium storefront

If the windows have been altered, what were they originally? Storefront

Wall Sheathing: Stucco

If the sheathing has been altered, what was it originally? NA

5. WORKMANSHIP (Describe the distinctive elements, if any, of craftsmanship or method of construction)

NATIONAL REGISTER STATUS (if listed, check appropriate box)

☐ Individually listed;	☐ Contributor	☐ Noncontributor to	Historic 1	District
Date Listed:	☐ Determ	nined eligible by Keeper of Na	ational Register (date:	,

RECOMMENDATIONS OF ELIGIBILITY (opinion of SHPO staff or survey consultant)

To be eligible for the National Register of Historic Places, a property must present an important part of the history or architecture of an area. Note: a property need only be significant under one of the areas below to be eligible for the National Register.

- A. HISTORIC EVENTS/TRENDS (On a continuation sheet describe how the property is associated either with a significant historic event, or with a trend or pattern of events important to the history of the nation, the state, or a local community.)
- B. PERSON (On a continuation sheet describe how the property is associated either with the life of a person significant in the past.)
- C. ARCHITECTURE (On a continuation sheet describe how the property embodies the distinctive characteristics of a type, period, or method of construction, or that represents the work of a master, or possesses high artistic values.)

Outbuildings: (Describe any other buildings or structures on the property and whether they may be considered historic.)

NTEGRITY NOTES OF THE PROPERTY
To be eligible for the National Register, a property must have integrity, that is, it must be able to visually convey its importance. Provide information below about the property's integrity. Use continuation sheets if necessary.
1. LOCATION ✓ Original Site ☐ Moved (date) Original Site:
2. DESIGN (Describe alterations from the original design, including dates - known or estimated - when alterations were made) Modern Ranch.
3. SETTING (Describe the natural and/or built environment around the property) Residential neighbors.
Describe how the setting has changed since the property's period of significance:
4. MATERIALS (Describe the materials used in the following elements of the property)
Walls (structure): Red brick Foundation: Unk. Roof: Flat w/overhang
Windows: Steel
If the windows have been altered, what were they originally? NA
Wall Sheathing: NA
If the sheathing has been altered, what was it originally? NA
5. WORKMANSHIP (Describe the distinctive elements, if any, of craftsmanship or method of construction)
Interesting metal supports at front porch.
NATIONAL REGISTER STATUS (if listed, check appropriate box)
☐ Individually listed; ☐ Contributor ☐ Noncontributor to Historic District
Date Listed: Determined eligible by Keeper of National Register (date:
RECOMMENDATIONS OF ELIGIBILITY (opinion of SHPO staff or survey consultant)
Property ☐ is ✓ is not eligible individually.
Property \checkmark is \Box is not eligible as a contributor to a potential historic district.

To be eligible for the National Register of Historic Places, a property must present an important part of the history or architecture of an area. Note: a property need only be significant under one of the areas below to be eligible for the National Register.

A. HISTORIC EVENTS/TRENDS (On a continuation sheet describe how the property is associated either with a significant historic event, or with a trend or pattern of events important to the history of the nation, the state, or a local community.)

B. PERSON (On a continuation sheet describe how the property is associated either with the life of a person significant in the past.)

C. ARCHITECTURE (On a continuation sheet describe how the property embodies the distinctive characteristics of a type, period, or method of construction, or that represents the work of a master, or possesses high artistic values.)

Outbuildings: (Describe any other buildings or structures on the property and whether they may be considered historic.)

To be eligible for the National Register, a property must have integrity, that is, it must be able to visually convey its impor-	rtance
Provide information below about the property's integrity. Use continuation sheets if necessary.	

	0 0	0 , 1 ,	's integrity. Use continuation sh	eets if necessary.

SIGNIFICANCE

To be eligible for the National Register of Historic Places, a property must present an important part of the history or architecture of an area. Note: a property need only be significant under one of the areas below to be eligible for the National Register.

A. HISTORIC EVENTS/TRENDS (On a continuation sheet describe how the property is associated either with a significant historic event, or with a trend or pattern of events important to the history of the nation, the state, or a local community.)

B. PERSON (On a continuation sheet describe how the property is associated either with the life of a person significant in the past.)

C. ARCHITECTURE (On a continuation sheet describe how the property embodies the distinctive characteristics of a type, period, or method of construction, or that represents the work of a master, or possesses high artistic values.)

Outbuildings: (Describe any other buildings or structures on the property and whether they may be considered historic.)

To be eligible for the National Register, a property must have integrity, that is, it must be able to visually convey its importa	псе
Provide information below about the property's integrity. Use continuation sheets if necessary.	

			roperty must have inte ty's integrity. Use con		e able to visually convey essary.	its importance.
1.	LOCATION	✓ Original Site	☐ Moved (date) Orig	inal Site:
