

STATUS TABLE: This Table describes the applicable project statuses included in the *Development Activity Map*. For by right permits, the statuses cover the period from which the project is approved, even if the permit has not yet issued, until the last stage prior to project completion. These permits are no longer shown after the point at which construction has been completed and the project “finalized.” For special approvals, the statuses include each point from the time an application is approved, up to the point at which final approvals are given, at which time the project is no longer shown on the *Map*. Not all possible project statuses are included in this Table.

Status	Definition
By Right Permit Statuses	
APPROVED	Permit has been approved by PDSD staff but not yet physically issued to the applicant to allow for construction to begin
ISSUED	Permit has been issued to the applicant and any construction authorized by the permit can commence
REVISION	Permit has been issued, but the applicant has resubmitted plans to PDSD in order to get approval for deviations from the original approved site or building plans
TEMP CO	Building construction is not fully complete, but a temporary certificate of occupancy has been issued to allow for specified interior work by the occupants
Special Application Statuses	
APPLIED	Application for the project has been received by PDSD staff and entered into the permitting system
ACCEPTED	Application has received an internal evaluation after submittal, has been determined to be complete and can undergo full review
PLAN CK	Plans associated with the project have been submitted to PDSD staff for review
AUTHRIZD	Mayor and Council has authorized a rezoning to proceed, subject to compliance of the project with any conditions required
ORDNANCD	Change of zoning classification for a property (rezoning) has been approved by Mayor and Council
